

For Immediate Release

Blake Anderson, former General Manager of Orange County Sanitation District (OCSD), joins the Clean Water Resources Advisory Board

FAIRFIELD, Connecticut—May 11, 2006

Clean Water Resources (“CWR”) announced that Blake Anderson, the former General Manager of Orange County Sanitation District (OCSD), has joined the Company’s Advisory Board. Mr. Anderson brings over 30 years of experience to public service including executive management, policy development, infrastructure advancement and organizational leadership.

“Blake brings to CWR the unique perspective of someone who has managed one of the largest sanitation districts in the country. Blake is a sophisticated, proactive and pragmatic leader and his insight and expertise will be invaluable at communicating CWR’s Capital Program initiative to district and system managers across North America” added Sinclair.

Mr. Anderson was the General Manager of the Orange County Sanitation District for five years and with the agency for 25 years in number of leadership capacities. The Sanitation District provides wastewater collection, treatment and disposal services to over two million people living and working in metropolitan Orange County. It is the sixth largest agency of its type in the United States and the third largest in California. He had oversight responsibilities for the programs and facilities necessary to ensure compliance with the California Regional Water Quality Control Board, the South Coast Air Quality Management District, and the U. S. Environmental Protection Agency. The agency had a \$2 billion capital improvement program underway providing system upgrades, rehabilitation and new capacity.

Mr. Anderson noted “CWR has really hit on something here. The opportunity to provide asset owners with a turn-key outsourced solution that shifts the risks of collection system spending from the owners to the private market is a major development. With this program, an owner can now truly, and cost-effectively, optimize their existing [collection system] assets before expanding treatment and storage capacity.”

About Clean Water Resources (www.CleanWaterResources.com):

Clean Water Resources is a multi-dimensional private company that distributes leading-edge products and markets financial solutions for infrastructure, with particular emphasis on the sewer and water industry. It recently introduced Duracoat™ (an ultra high performance concrete) and The Lifespan System®, (a state-of-the-art system for manholes, catch basins and utility structures). The CWR Capital Program is a design-build-finance (D/B/F) contracting solution that provides risk capital and performance-based payment alternatives to system owners for addressing Clean Water and underground infrastructure issues.
